Straw Man Proposal: Joint Taskforce on Education Finance

December 3, 2012

In recent years the Legislature has adopted three substantial new policies that directly impact schools districts, yet no funding has been provided for these new duties.

These three new initiatives are laser focused on improving student achievement in our state and closing the opportunity gap. Yet without the needed resources to accompany the requirements, these important initiatives will not bring the intended results - great outcomes for students.

Please consider these three additional funding items as an accompaniment to the underlying enhancements of K-3 class size reduction, full-day kindergarten, pupil transportation and MSOC.
